

Investment Objective

The LS FAANG+ ETP is a physically replicated, UCITS eligible Exchange Traded Product (ETP) designed to provide investors with a total return exposure to the Solactive FAANG+ Index, minus fees.

The Solactive FAANG+ Index tracks the performance of a portfolio of ten (10) highly-traded growth stocks of technology and tech-enabled companies which includes as core components:

- ▶ Meta Platforms Inc.
- ▶ Apple Inc.
- ▶ Amazon.com Inc.
- ▶ Netflix Inc.
- ▶ Microsoft Corp..
- ▶ Alphabet Inc. (Class A)
- ▶ Tesla Inc.

and then the next largest, most liquid, tech-enabled stocks listed and headquartered in the United States.

The Solactive FAANG+ Index is a rules-based, equal-weighted equity index that rebalances annually. As such, at each rebalancing date, each component will be re-weighted back to 10% of the Solactive FAANG+ Index and the Non-Core Components will be determined again based on the eligibility criteria set out in the Solactive FAANG+ Index methodology.

The Solactive FAANG+ Index is owned, calculated, administered and published by Solactive AG assuming the role as index administrator under Regulation (EU) 2016/1011.

Risk Warnings

The value of an investment in ETPs may go down as well as up and past performance is not a reliable indicator of future performance. An investment in ETPs is dependent on the performance of the underlying index, less costs, but it is not expected to match that performance precisely. ETPs offering daily leveraged or daily short exposures ("Leveraged ETPs") are products which feature specific risks that prospective investors should understand before investing in them.

Securities issued by the Issuer are products involving a significant degree of risk and may not be suitable for all types of investor. Any decision to invest should be based on the information contained in the Relevant Prospectus of the Issuer (or any supplements thereto) which includes, inter alia, information on certain risks associated with an investment. The price of any securities may go up or down and an investor may not get back the amount invested. Securities are priced in US Dollars/Euros/Pounds and the value of the investment in other currencies will be affected by exchange rate movements.

Short and leveraged exchange-traded products are only intended for investors who understand the risks involved in investing in a product with short and/or leveraged exposure and who intend to invest on a short-term basis. Any investment in short and/or leveraged products should be monitored on a daily basis to ensure consistency with your investment strategy. You should understand that investments in short and/or leveraged exchange-traded products held for a period of longer than one day may not provide returns equivalent to the return from the relevant unleveraged investment multiplied by the relevant leverage factor.

Potential losses in short and/or leveraged exchange-traded products may be magnified in comparison to investments that do not incorporate these strategies. Please refer to the section entitled "Risk Factors" in the relevant prospectus for further details of these and other risks associated with an investment in short and/or leveraged exchange-traded products. You should consult an independent investment adviser prior to making an investment in short and/or leveraged exchange-traded products in order to determine its suitability to your circumstances.
