

Key Information Document ("KID")

Leverage Shares plc

LS Short Volatility Long Tech ETP

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Product:	LS Short Volatility Long Tech ETP ("ETP Securities")
PRIP Manufacturer:	Leverage Shares Plc (the "Issuer")
Product ISIN:	XS2595675641
Website:	https://leverageshares.com/
Telephone:	+1 203 883-9646
Regulated by:	Central Bank of Ireland and Financial Conduct Authority are responsible for supervising Leverage Shares Plc in relation to this Key Information Document.
Document valid as at:	27/06/2025

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type:	Collateralised Exchange Traded Securities. The return of the product depends on the performance of an underlying asset. Please consider that there is no capital protection against market risk.
Term:	This product does not have a fixed term. The term will depend on how long you choose to hold the product, however the ETP Securities have a scheduled maturity date of 21/03/2073. The ETP securities may be redeemed prior to the scheduled maturity date, if: (1) the Issuer redeems all of the ETP Securities in the series following five calendar days written notice to you; (2) an event of default occurs; or (3) a mandatory redemption event occurs. A detailed description of early redemption events can be found in the prospectus in the Terms and Conditions of the ETP Securities.
Objectives:	The objective of the ETP Securities is to track the Short Volatility Long Tech Investment Strategy, an actively managed investment strategy developed by the Portfolio Administrator, GWM Ltd, which aims to assume long positions on a basket of predominantly tech-driven stocks and a short exposure to volatility (the "Investment Strategy"). The Investment Strategy return seeks to capture the contango of the futures volatility curve and the appreciation of certain technological companies. The Reference Assets of the Investment Strategy may include: • iPath® Series B S&P 500® VIX Short-Term Futures™ ETNs ("iPath ETNs") • ProShares VIX Short-Term Futures ETF (together with the iPath ETNs, the "Volatility Assets") • Invesco QQQ Trust, Series 1 ("QQQ") The Investment Strategy aims to have a 15% short exposure to volatility by shorting Volatility Assets and a long tech-biased exposure by investing in QQQ. The underlying assets in respect of this product are held in the margin account and are as follows: the Reference Assets, the mark to mark value of any securities loans, any cash balances and any ancillary assets which are not required to replicate the performance of the Short Volatility Long Tech Investment Strategy (the "Collateral Assets"). The Issuer's payment obligations in respect of the ETP Securities will be funded by liquidating the Collateral Assets. The ETP Securities are non-interest bearing and are not principal protected and you may lose some or all of your investment. You have no right to dividends from the Reference Assets, nor are you entitled to any additional rights arising from the Reference Assets (such as voting rights).
Intended retail investor:	The ETP securities are intended for retail investors who: (i) have specific knowledge or experience of investing in similar products and in financial markets, and have the ability to understand the product and its risks and rewards; (ii) are seeking an investment that reflects an expectation that the Reference Asset will increase in value over time, (iii) may bear a total loss of the amount invested; and (iv) have a long investment horizon in line with the recommended holding period stated below.

What are the risks and what could I get in return?

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily, or you may have to sell at a price that significantly impacts on how much

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as class 6 out of 7, which is the second-highest risk class.

This rates the potential losses from future performance at a high level, and poor market conditions are very likely to

you get back.

impact the capacity to pay you.

Be aware of currency risk. If you buy this product in a currency different than USD, the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of LS Short

Volatility Long Tech ETP and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 years Example Investment: USD 10 000 Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress scenario	What might you get back after costs	USD 904	USD 1324.13
	Average return each year	-90.96%	-33.26%
Unfavourable scenario	What might you get back after costs	USD 6187	USD 6721.63
	Average return each year	-38.13%	-7.64%
Moderate scenario	What might you get back after costs	USD 12233	USD 23160.09
	Average return each year	22.33%	18.29%
Favourable scenario	What might you get back after costs	USD 21480	USD 37043.70
	Average return each year	114.80%	29.94%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 03/11/2021 and 03/11/2022. Moderate: This type of scenario occurred for an investment between 11/11/2019 and 07/11/2024. Favourable: This type of scenario occurred for an investment between 27/06/2016 and 29/06/2021.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor and any on exchange bid/offer spreads. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Leverage Shares plc is unable to pay out?

The product is not protected by the Irish Deposit Guarantee Scheme or any other investor compensation or guarantee scheme. If we fail to make a payment when due, the trustee (Apex Corporate Trustees (UK) Limited) can enforce the security over the Collateral Assets. Once the trustee has enforced the security it can then sell the Collateral Assets and use of the proceeds of this sale to pay the amount owed to you under the ETP Securities. The proceeds of such sale may not be enough to cover all amounts owed to you under the ETP Securities and you may lose some of all of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- **USD 10 000** is invested.

Investment USD 10 000	If you exit after 1 year	If you exit after 5 years
Total costs	USD 136.93	USD 4798
Annual cost impact (*)	1.37%	1.37%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 22.83% before costs and 18.29% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee for this product when purchased on exchange. *	USD 0
Exit costs	We do not charge an exit fee for this product when purchased on exchange. *	USD 0
Ongoing costs taken each year		If you exit after 1 year
Management fees and other administrative or operating costs	1.35% of the value of your investment per year. This is an estimate based on actual costs over the last year.	USD 135
Transaction costs	0.02% of the value of your investment per year. This is an estimate of the	USD 1.93

	costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	
Incidental costs taken under specific conditions		If you exit after 1 year
Performance fees	A fee equal to the maximum of (i) zero and (ii) 10% of the difference between the value of the ETP Securities on that day and the previous highest value of the ETP Securities, where such value is calculated using the methodology for calculating their ETP Security Value but excluding this performance based fee.	USD 0

(*) Investors dealing via stock exchanges will be subject to bid/offer spreads and pay fees charged by stock brokers. Such spreads can change at any time and can be observed in the exchanges where the ETP Securities are listed and traded. Investors can obtain from their stock brokers the fees they charge for dealing in the ETP Securities. Authorised participants dealing directly with Leverage Shares plc will pay transaction costs.

How long should I hold it and can I take my money out early?

Recommended minimum holding period: **5 years**

Recommended holding period: 5 years.

You may trade this product on the stock exchanges where it is listed at your own discretion. You may choose to sell your ETP Securities prior to their maturity in accordance with your investment objectives. You should be aware that the ETP Securities may not be readily sold and the value of the ETP Securities may be substantially less than the price you paid for them.

The Issuer may terminate this product unilaterally, and in certain compulsory redemption events may do so on very short notice in accordance with the prospectus.
