From inception through 10/31/25, ASMG had a NAV total return of 70.49%.

The Fund utilizes derivatives, such as swap agreements, to achieve its leverage. Limitations in the availability or pricing of these derivatives can affect the Fund's ability to maintain its targeted exposure. ASMG employs daily leverage, aiming for 2x the daily return of ASML. In volatile markets, this can lead to 'volatility drag,' where the Fund's performance diverges negatively from the expected multiple over longer periods.

## HOW DID THE FUND PERFORM SINCE ITS INCEPTION?\*

The \$10,000 chart reflects a hypothetical \$10,000 investment. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains. Fund expenses, including management fees, were deducted.
